ANSH SHARMA

Full Stack Developer | React.js · Next.js · Node.js · WebRTC

anshsharma7400@gmail.com | +91 7400772171 | github.com/ansh23092002 | linkedin.com/in/ansh-sharma

PROFESSIONAL SUMMARY

Full Stack Developer with proven expertise in engineering production-grade real-time systems and government web platforms. Architected a WebRTC video conferencing platform handling media streams and led a state-level digitization project end-to-end. Specialized in Next.js, Node.js/Express, scalable state management, and secure API design.

WORK EXPERIENCE

Full Stack Developer — Ailifebot | *Sep 2025 – Present*

- Architected and led the development of Loop-in, a real-time WebRTC conferencing platform, managing the signaling layer, TURN/STUN relay, and Google OAuth2/JWT authentication.
- Reduced manual release overhead by 40% by implementing an automated CI/CD deployment pipeline targeting AWS EC2 with Nginx reverse proxy and PM2 process management.
- Improved application load time by 30% across 5+ production dashboard modules using code splitting, memoization, and dynamic component imports.
- Built and integrated secure RESTful micro-endpoints enforcing role-based token authorization for enterprise clients.

Frontend Developer — Inext Software Solutions | *Aug 2024 – Aug 2025*

- Accelerated front-end sprint delivery by 25% by engineering a shared, reusable UI component library adopted across internal enterprise dashboards.
- Integrated high-throughput Node.js/Express REST APIs with React/Next.js client applications, enabling dynamic, low-latency business workflows.
- Partnered directly with product and design teams to standardize UI/UX consistency across responsive viewports.

Frontend Developer Intern — Xtention Crew Technologies | *Oct 2023 – Mar 2024*

- Built and integrated an interactive real-time chat module using React.js and Vue.js with live status and message updates.
- Gained hands-on production experience in modular component architecture, state management, and cross-browser testing.

KEY PROJECTS

CGMSC EMSA — State Medical Inventory Management Platform | Project Owner cgmsc.gov.in/Emsa

- Spearheaded the end-to-end architecture and deployment of a full-stack platform serving government medical inventory and distribution operations statewide.
- Migrated legacy, non-indexed frontend code to Next.js SSR and paginated data flows, reducing initial page load times by 45%.
- Implemented robust role-based access control (RBAC), audio alerts/notification workflows, and strict endpoint validation.

Earth Care Foundation — NGO Portal & Payment Backend theearthcarefoundation.org

- Engineered the complete web application and backend logic for student scholarship applications (Project Udaan 2.0) and public donations.
- Integrated PhonePe payment gateway, processing online donation transactions with zero payment drop-offs caused by UI failures.

FuelTrack Tech — Fleet & Fuel Management Dashboard fueltrack.in

- Reduced redundant API traffic by 35% through query caching, request deduplication, and optimized SWR data fetching.
- Built data-heavy report tables and responsive fleet monitoring interfaces using Next.js and TailwindCSS.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Frontend: React.js, Next.js, Vue.js, Redux, TailwindCSS, Responsive Design
Backend: Node.js, Express.js, RESTful APIs, WebRTC (TURN/STUN, ICE Protocol)
Databases & Caching: MySQL, SQL Server, MongoDB, Redis
Security & Auth: JWT, Google OAuth2, RBAC, Data Sanitization
DevOps & Tools: AWS EC2, Nginx, PM2, Docker, CI/CD Pipelines, Git, Linux (Ubuntu), Postman

EDUCATION

B.Tech, Computer Science & Engineering — Rungta College of Engineering & Technology (CSVTU) | 2025 | CGPA: 8.10/10
