ANSH SHARMA

Full Stack Developer | React.js · Next.js · Node.js · WebRTC
anshsharma7400@gmail.com | +91 7400772171 | github.com/ansh23092002

PROFESSIONAL SUMMARY

Full Stack Developer working with React, Next.js and Node.js. Have built a government inventory system for CGMSC, a WebRTC video calling platform and production dashboards for business clients. Comfortable taking a feature from requirement to deployment, with a focus on speed, security and clean, maintainable code.

CORE COMPETENCIES

Frontend: JavaScript, TypeScript, React.js, Next.js, Vue.js, Redux, TailwindCSS, Responsive Web Development
Backend & APIs: Node.js, Express.js, RESTful API Design, Role-Based Access Control, API Validation
Databases: MySQL, SQL Server, MongoDB, Redis
Security: JWT, Google OAuth2, Token-Based Auth, Secure Endpoint Routing, Input Sanitization, Security Audits
Real-Time Systems: WebRTC, TURN/STUN, Signaling, ICE Candidate Exchange, Media Stream Management
Performance & Quality: Code Splitting, Lazy Loading, Memoization, SSR, Request Deduplication, Testing, Debugging
DevOps & Tools: CI/CD Pipelines, AWS EC2, Nginx, PM2, Docker, Linux (Ubuntu), Git, GitHub, Postman

EXPERIENCE

Full Stack Developer — Ailifebot — Sep 2025 – Present
- Developed 5+ dashboard modules that show live data and drive daily business workflows, using React, Next.js, Node.js and Express.
- Reduced re-renders with lazy loading and memoization to keep the dashboards fast and responsive.
- Wrote secure REST APIs with JWT login and managed deployment on AWS EC2 with Nginx and PM2.

Frontend Developer — Inext Software Solutions — Feb 2024 – Aug 2025
- Built responsive dashboards and internal tools in React and Next.js, connected to Node/Express APIs.
- Created a reusable component library that sped up sprint delivery by 25% and kept the UI consistent.

Frontend Developer Intern — Xtention Crew Technologies — Aug 2023 – Jan 2024
- Created dashboards in React and Vue, plus a live chat module with real-time messaging.

PROJECTS

CGMSC EMSA — Govt. Inventory System | *Project Owner* | cgmsc.gov.in/Emsa — Next.js, Node.js
- Owned the project from requirements to production, supporting stock tracking and allocation for CGMSC.
- Moved an old, non-SEO app to Next.js with server-side rendering and pagination, cutting initial page load by 45%. Added role-based access, audio-call notifications and endpoint security.

Earth Care Foundation — Website & Backend | theearthcarefoundation.org — Next.js, Node.js, Express.js
- Developed the full website and backend, including scholarship applications (Project Udaan 2.0) and online donations. Integrated PhonePe payment gateway for scholarship and donation workflows with responsive payment flows and error handling.

FuelTrack Tech — Fuel Management | *Frontend Developer* | fueltrack.in — Next.js, TailwindCSS
- Handled the entire frontend, including dashboards and report views. Used code splitting and request deduplication to speed up pages and cut redundant API traffic by 35%.

Loop-in — Video Conferencing | *Team Lead* | loopin.services.ailifebot.com — React, Node.js, WebRTC
- Led the team and wrote the WebRTC signaling (peer connections, ICE exchange, media streams) with a TURN server, JWT and Google OAuth2.
- Set up hosting on AWS EC2 with Nginx and PM2, and added a CI/CD pipeline that cut manual release effort by 40%.

ACHIEVEMENTS

- Launched a government inventory management system for CGMSC (Chhattisgarh Medical Services Corporation), covering stock tracking and allocation.
- Improved page load time by 30% using code splitting, lazy loading and memoization.
- Shipped 5+ live dashboard modules for business clients at Ailifebot.
- Constructed a full-fledged video conferencing solution integrating Google OAuth2 for seamless user authentication; increased user engagement by 50%, allowing faster onboarding of new clients and reducing setup time by 30%.

EDUCATION

B.Tech, CSE — Rungta College of Engineering & Technology (CSVTU) — 2025 | CGPA: 8.10/10
